### Sheep Genetics Lambplan Terms

**BWT** - birthweight - lower birthweight values will producer lighter birthweight lambs

**WWT** - wean weight

**PWT** - post weaning weight - a higher postweaning weight value ram will produce faster growing lambs

**PFAT** - post weaning fat - the more negative the pfat value, the leaner the lambs will be

**PEMD** - post weaning eye muscle depth - rams with positive values for pemd will have more muscle

especially in the high value loin area and hind quarter with better overall carcass shape

**LEQ** - Lamb Eating Quality - is a new index incorporating lean meat yield and eating quality with no emphasis on birthweight

**Inspection is from 11.30am**

**Please join us for a BBQ lunch prior to the commencement of our Ram Sale at 1.00pm**
