### Poll Dorset Sires used for 2020 drop

Bruan	190007	Woolumbool	196431	Pepperton	190126
Bruan	190140	Derrynock	180067	Pepperton	180339
Felix	190141	Melton Vale	190152	Pepperton	180342
Felix	190968	Pepperton	190123	Pepperton	200113

### **Animal Health**

MN2 Approved Vaccinated for Ovine Johnes Disease - Certificate No VS1262

Ovine Brucellosis Accredited Free - Certificate No 2241

All lambs are vaccinated with Gudair at marking. Eryvac x 2 and Glanvac B12

**Ram Breeders Please Note:** The Minimum price for a ram to be individually registered as a Stud Ram will be \$5000

**Not all rams are able to be registered with APDA. Please check your choices**

**Rams with Red Lot Numbers are pure Poll Dorset Rams. Rams used in Pepperton Flock are lot 4, lot 10, lot 13 and lot 21**

**Please Register with [elitelivestockauctions.com.au](http://elitelivestockauctions.com.au) a few days presale to familiarise yourself with the site**

Semen collected from Sale Rams prior to the sale can be sold by Pepperton at anytime

### **Lambplan-ASBVs Explanations**

**Birth Weight (bwt)** – describes the genetic merit for weight at birth a + ASBV means the progeny will be genetically heavier at birth.

**Growth (wwt) – weaning weight 100 days (pwwt) – post weaning 200 days**

– describes the genetic merit for growth rate. a + ASBV means the animal is genetically faster growing

**Fat (pfat)** – describes the value of genes for fat depth, at constant weight a – ASBV means a genetically leaner animal

**Muscle (pemd)** – describes the value of genes for eye muscle depth a + ASBV means genetically more meat i.e. (potentially better yield)

**Terminal Carcase Production (TCP)**- includes increasing PWT, PEMD, dressing %, lean meat yield and eating quality (**EQ**) while decreasing carcase fat.

Sheep with better eating quality will have higher ASBVs for intramuscular fat (more marbling) and lower ASBVs for shear force (better tenderness).
