### Sires used for 2020 drop

Ella Matta	160026	Pepperton	190126
Pepperton	190457	Pepperton	180342
Pepperton	190446	Pepperton	200113

### **Animal Health**

MN2 Approved Vaccinated for Ovine Johnes Disease - Certificate No VS1262

Ovine Brocelloses Accredited Free - Certificate No 2241

All lambs are vaccinated with Gudair at marking. Eryvac x 2 and Glanvac B12

**Ram Breeders Please Note:** The Minimum price for a ram to be individually registered as a Stud Ram will be \$5000

**Rams with Red Lot Numbers have been used in the flock this year and have lambs on the ground**

**Please Register with [elitelivestockauctions.com.au](http://elitelivestockauctions.com.au) a few days presale to familiarise yourself with the site**

Pepperton advises their intention to maintain a semen interest in all rams offered. This means Pepperton reserves the right to collect semen from any ram offered, for use within own flock only, at the convenience of the purchaser and at the cost to Pepperton  
Semen collected from Sale Rams prior to the sale can be sold by Pepperton at anytime

### **Lambplan-ASBVs Explanations**

**Birth Weight (bwt)** – describes the genetic merit for weight at birth a + ASBV means the progeny will be genetically heavier at birth.

**Growth (wwt) – weaning weight 100 days (pwwt) – post weaning 200 days**

– describes the genetic merit for growth rate. a + ASBV means the animal is genetically faster growing

**Fat (pfat)** – describes the value of genes for fat depth, at constant weight a – ASBV means a genetically leaner animal

**Muscle (pemd)** – describes the value of genes for eye muscle depth a + ASBV means genetically more meat i.e. (potentially better yield)

**Terminal Carcase Production (TCP)**- includes increasing PWT, PEMD, dressing %, lean meat yield and eating quality (**EQ**) while decreasing carcase fat.

Sheep with better eating quality will have higher ASBVs for intramuscular fat (more marbling) and lower ASBVs for shear force (better tenderness).
