PEPPER TON FARMS

POLL DORSET AND WHITE SUFFOLK RAMS

Pepperton Farms is a sixth-generation farming enterprise in Central Victoria operated by Roger and Dianne Trewick, along with their son Kurtis and his partner Tara.

Whilst the property was settled in 1864, the Trewick family have been breeding stud rams since 1943, having started with Wharoonah Dorset Horns. Since establishing the Pepperton Poll Dorset Stud in 1994 and White Suffolk Stud in 2004, we have been in a constant cycle of development and refinement to ensure we remain at the forefront of industry innovation.

Pepperton were early adopters of data-driven strategies to achieve measurable progress towards our breeding objectives, and Pepperton are long-standing members of the 'Meat Elite Australia Group' and 'Sheep Genetics Australia'.

In 1999, after realising its potential to maximise genetic gain, Pepperton began using artificial insemination to join all ewes. Since then and in order to remain competitive within the industry, we have maintained a persistent effort to adapt our methodologies as the technology and genetic research has developed along with the consumer market continually evolving.

This lifetime of experience and quest for continual improvement has enabled Pepperton Farms to refine their blood lines and breed the top-quality rams they're renowned for today.

PEPPER TON FARMS

POLL DORSET AND WHITE SUFFOLK RAMS

Our Breeding Program

We are firm believers in quality over quantity, and our high threshold for what we accept in our stud has resulted in a very even spread of high-quality ewes that dependably produce very high-quality rams, year after year.

Through market analysis and data-informed breeding plans, we've refined our breeding program to produce rams with traits demanded by consumers; such as high-muscling, fast growth and low-moderate birth weight with improved lean meat yield and dressing percentages.

Rams available

Our top 80 rams with the highest indexes will be presented for auction. The remaining rams will later be available for private sale. Free delivery to NSW, VIC and SA.

Rams Health Status

- MN3 Approved Vaccinated for Ovine Johnes Disease Certificate No. VS1262.
- Ovine Brucellosis Accredited free Certificate No. 2241.
- Vaccinated with Gudair, Glanery B12 at marking.
- Drenched with Triguard.
- All rams were shorn in August.

Lambplan ASBV

BWT – ‘Birth Weight’ describes the genetic merit for weight at birth.

WWT – ‘Wean Weight’ (100 days)

PWWT – ‘Post Wean Weight’ (200 days)

WWT and PWWT – describes the genetic merit for growth rate.
A + ASBV means the animal is genetically faster growing.

PFAT – ‘Post Weaning Fat’ describes the value of genes for fat depth, at constant weight a – ASBV means a genetically leaner animal.

PEMD – ‘Post Weaning Muscle’ describes the value of genes for eye muscle depth a + ASBV means genetically more meat i.e. (potentially better yield).

LMY – ‘Lean Meat Yield’ Rams with more positive lean meat yield (LMY) ASBVs produce lambs that have a higher lean meat yield percentage at slaughter. Lean meat yield is expressed as a percentage of the Hot Standard Carcase Weight, where all bone and salvage fat is removed. A ram with an ASBV of 2.4 will produce progeny that are 1.2 percent higher than progeny of a ram with an ASBV of 0.

IMF (marbling) – ‘Intramuscular fat’ is a measure of the chemical fat percentage in the loin muscle of a lamb and is often referred to as marbling. IMF has been shown to have a significant impact on the flavour, juiciness, tenderness and overall liking of lamb. Rams with more positive IMF ASBVs produce progeny with more intramuscular fat.

SHEARF (tenderness) – ‘Shear Force’ is a measure of the force or energy required to cut through the loin muscle of lamb after 5 days of ageing, the ASBV is reported in deviations of kilograms of force. Rams with more negative SF5 ASBVs produce lambs with more tender meat.

LEQ – ‘Lamb Eating Quality’ The LEQ index targets improvement of terminal sire performance in prime lamb production systems where internal parasites may cause economic losses. • LEQ balances large improvements in eating quality with modest increases in lean meat yield and includes emphasis on worm egg count ASBVs. • Genotyping young rams makes LEQ more effective by improving the accuracy of carcass and eating quality ASBVs.

TCP – ‘Terminal Carcase Production’ includes increasing PWWT, PEMD, dressing %, lean meat yield and eating quality (LEQ) while decreasing carcass fat.

Disclaimer-Information sourced from Sheep Genetics Website

PERCENTILE BANDS

Within the catalogue, genetic attributes of each ram have been colour coded to aid your quick assessment. These colours are indicative of how that ram is ranked in comparison to the rest of the breed nation-wide.

As an example, see below the exceptional attributes for **Lot 3 – 240281**.

Lot 3 – 240281									
BWT	WWT	PWWT	PEMD	PFAT	LMY	IMF	SHEARF	LEQ	TCP
0.34	13.28	19.28	6.06	0.11	5.22	-0.89	2.46	171.47	179.67

For clarification of margins for the percentile **band** for each attribute, refer to the below table from Sheep Genetics:

Band	BWT	WWT	PWT	PEMD	PFAT	LMY	IMF	SHEARF5	LEQ	TCP
1	-0.49	13.79	21.35	4.62	1.52	5.39	0.57	-3.47	166.52	167.22

ABOUT THE 2024 DROP

The tables below and graphs on the following pages indicate how the ASBVs of our rams compare against the breed and the analysis (target trend) from Sheep Genetics. The graphs illustrate the improvements we have achieved in our flock over the past 10 years in response to the evolving customer demand.

Figures correct as of SEPTEMBER 1st 2025 analysis

ASBVs are a prediction of an animal's genetic merit for a particular trait and are an indication of how an animal's progeny will perform based on the genes they will pass on. An astute purchaser should consider these along with an assessment of the ram's physical appearance.

In Honour of Michael Glasser

In honour of our late Stud stock Agent Michael Glasser, who passed away in May, the proceeds of **Lot 1** sold at our ram sale will be donated to **Bowel Cancer Australia**.

Michael supported us from our very first stud sale many years ago. His generosity with his time and knowledge was invaluable to us, and we will miss him greatly!

Important information

If selecting rams for stud purposes, please note not all rams are able to be registered with the APDA. Purity of each animal is notated in the catalogue.

Stud transfer fee minimum sale price is **\$4000**

Pepperton Farms retains the rights to use or sell any semen collected prior to the sale.

POLL DORSET SALE RAMS

Lot 1 – 240239

Not Pure/DNA

Sire: 1640732022220231 | Dam: 1640732021210238 | Birth Type: Twin | D.O.B: 8-April

BWT	WWT	PWWT	PEMD	PFAT	LMY	IMF	SHEARF	LEQ	TCP
0.44	14.56	22.38	5.52	.026	5.54	-0.67	2.28	174.18	180.49

Proceeds from lot 1 will be donated to Bowel Cancer Australia in honour Michael Glasser. This impressive well-structured ram comes with even more impressive figures. Like Michael, he is among the best in the country and in the top 1% for WWT, PWWT, PEMD, LMY, LEQ and TCP.

Lot 2 – 240214

Not Pure/DNA

Sire: 1640732022220231 | Dam: 1640732021210210 | Birth Type: Single | D.O.B: 7-April

BWT	WWT	PWWT	PEMD	PFAT	LMY	IMF	SHEARF	LEQ	TCP
0.75	15.84	22.62	4.32	-1.20	6.58	-0.62	3.60	172.67	181.26

A top pick for the early market producers with great figures across the board culminating in the top 1% for TCP and LEQ. He has some of the highest WWT and PWWT figures you're likely to find anywhere so he's sure to get those early maturing suckers off to market quickly.

Lot 3 – 240281

Pure/DNA

Sire: 1640732022220305 | Dam: 1640732023230037 | Birth Type: Single | D.O.B: 6-August

BWT	WWT	PWWT	PEMD	PFAT	LMY	IMF	SHEARF	LEQ	TCP
0.34	13.28	19.28	6.06	0.11	5.22	-0.87	2.46	171.47	179.67

A solid well-structured ram with impressive figures across the board including positive fat and extreme muscling which shows in his movements. His PEMD, LEQ and TCP are all in the top 1%.

Lot 4 – 240340

Pure/DNA

Sire: 164073202222305 | Dam: 16407320220002 | Birth Type: Twin | D.O.B: 10-August

BWT	WWT	PWWT	PEMD	PFAT	LMY	IMF	SHEARF	LEQ	TCP
0.61	14.17	20.88	5.05	-0.10	5.58	-0.37	2.42	174.79	177.54

A solid ram that commands presences. An excellent choice for the early maturing suckers with his WWT, muscling and LMY all being in the top 1%.
